

## **Senior Campus Bring Your Own Device Program BYOxLink Solution Migration Friday 21<sup>st</sup> August 2020**

Nambour State College is a Bring Your Own Device school which identifies ***“24/7” access to online learning materials and access to an individual learning device*** as essential aspects of a contemporary learning environment. In the Junior Campus the college runs a BYO iPad program and in the Senior campus this appears as a BYO Device where iPads, Windows or MacOS laptops and mobile phones are considered acceptable as devices for learning.

During the last June/July school break all wireless points and infrastructure across the college campus were upgraded. This will give a wider and more reliable access to WIFI for students and staff when.

The next step is to migrate all students and staff in the senior campus from the existing BYO Connect system to the new BYOxLink Solution.

The key benefits of the new system are:

- More efficient and effective management of devices by the college
- Reduced operational costs and provide enhanced services
- A more secure method of wireless network authentication
- Students and staff can prepare their device at home or at school

This migration is scheduled to occur at midday on Friday 21<sup>st</sup> August (week 6). Students and staff will be able to prepare their devices at home or at school **prior** to this date but any device not prepared will not work after that.

**Only student and staff Windows and MacOS laptops currently connected via BYO Connect MUST prepare their devices at home or school PRIOR to midday on Friday 21<sup>st</sup> August, 2020. All other devices will part of a migration to occur in term 4.**
